

Teacher Professional Development Series

Bring the natural world into your classroom to help teach science, math, and language arts standards.

Bring the Outside In - Saturday, February 12th

Simple strategies for building community, using nature in lessons, and getting your students outdoors. Learn new team challenges, practice outdoor group management, and explore sensory mapping.

Lessons from the Ocean - Saturday, March 5th

Using ocean themes to improve science, math, and reading skills. Conduct a student-centered water investigation, learn a plastic in the oceans activity, and explore cultural connections to the bay and the ocean.

Our Changing Climate - Saturday, April 2nd

Teaching basic climate science and empowering your students to take action. Investigate “garbology,” practice teaching the carbon cycle, and develop simple student action projects.

Time: All workshops are from 9:30am—3:30pm

Location: Bahia Vista Elementary School, San Rafael

Participants: Current Bay Area classroom teachers, grades 4-7

Cost: Free

Free!
